ABSTRACT

The guide to courseware for computer-assisted instruction and computer-managed instruction in bilingual education, English as a second language, and second language instruction contains entries from the National Clearinghouse for Bilingual Education's database and selected courseware for the related areas of special education, vocational education, and adult basic education. Each entry includes: (1) the name/title of the courseware program; (2) the producer's name, address, and telephone number; (3) computer hardware, memory/equipment requirements, software specifications, and courseware format; (4) the language; (5) the type of program or instructional technique; (6) the content area; (7) the grade or proficiency level; and (8) a brief abstract, with external evaluation if available. The courseware is also indexed alphabetically by title, content area, and language. (MSE)

Introduction

This Guide offers information on courseware for computer-assisted instruction (CAI) and computer-managed instruction (CMI) in bilingual education, English as a second language, and second language instructional settings. The entries on the different programs are from the National Clearinghouse for Bilingual Education's computerized database, "Microcomputer Courseware Resources Online" (MICRO). In addition, selected courseware for the related areas of special education, vocational education, and adult basic education has been included.

This expanded edition updates and replaces the Guide to Microcomputer Courseware for Bilingual Education and Related Settings, Volumes 1 and 2 (1983). NCBE has added over 230 new programs, deleted many obsolete programs, and grouped several related programs into single entries to eliminate repetition of similar versions. Changes have also been made to existing entries to update availability information and program descriptions, to the extent possible.

To identify CAI courseware suitable for MICRO, NCBE has collected catalogs describing the programs of courseware producers, publishers, and distributors. For each entry in this guide, the following information has been extracted from the courseware catalogs:

- name/title of the courseware program
- producer's name, address, and telephone number
- computer hardware, memory/equipment requirements, software specifications, and format of courseware
- language
- type of program/instructional technique
- content area
- grade/proficiency level
- brief abstract (no evaluation provided by NCBE).

To assist readers in selecting suitable courseware from among the programs listed in this Guide, NCBE has attempted to identify which CAI programs have been reviewed in educational computing publications or evaluated by courseware evaluation services. This evaluation information, where applicable, has been incorporated into the MICRO entry that follows the abstract. Readers new to the field of CAI may wish to consult a related NCBE publication, Computer-Assisted Instruction: Learning Online, which provides basic resources for selecting and evaluating microcomputer courseware, as well as useful information about computers in the bilingual classroom.

Each entry in the Guide has been assigned a MICRO or MC number. The 466 entries in the Guide are arranged sequentially beginning with MC0001 and ending with MC0586 (not all numbers in the sequence are represented in this Guide due to deletion of outdated entries). A key to the data elements found in a typical entry appears on page vii, along with an explanation of the classification and indexing schemes used by NCBE. Pages 105-171 provide an alphabetical list of titles included in this volume. On pages 173-296, two indexes give access to the materials by content area,

title, and hardware type; and by language, title, and grade level. The indexes and titles refer the reader to the appropriate MC number.

The information that appears in this publication parallels a computer-searchable record in the MICRO database. Periodic updates will be made to the database so that interested readers who request customized computer searches of the MICRO database will receive the most current listings. For more information on any specific computer-based program, please contact the producer, not the clearinghouse.

The clearinghouse gratefully acknowledges the efforts of all those who collaborated in this project, particularly Ann Wroth and Roberto Llames. Readers are invited to submit additions and suggestions for inclusion in the MICRO database.

National Clearinghouse for Bilingual Education

MICRO KEY

AN MICRO NUMBER - Unique identifying number assigned by NCBE.

TI TITLE - Full title of the courseware program.

IN PRODUCER - Name, address, and telephone number of the courseware producer.

HW HARDWARE - Types of computer hardware on which the courseware runs.

RQ REQUIREMENTS - Amount of computer memory, peripherals, or other equipment required.

SW SOFTWARE - Computer languages used by the program or operating systems required to run the program.

FR FORMAT - Disk or tape.

LG LANGUAGE - Language (e.g., Spanish) in which the courseware is written.

TP TYPE OF PROGRAM - Instructional methodologies/techniques used or functions of the program, such as:

- **Authoring**, which uses simple commands and standard formats to allow teachers to create programs tailored to their students' needs;
- **Drill and Practice**, which reinforces previously taught concepts through various exercise drills and often incorporates branching capabilities to alter the sequence of practice based on student performance;
- **Game**, which often pits the student against the computer in an arcade-style competition as a setting for computer literacy, educational motivation, or instructional content;
- **Problemsolving**, which requires the student to instruct or program the computer in order to solve a particular problem;
- **Recordkeeping**, which allows the teacher or administrator to use the computer to manage instruction through storing student records, tracking student performance, and manipulating student data;
- **Simulation**, which presents the student with situations requiring decision making and the subsequent chain of events depends on the student's decisions;

- Tutorial, which presents a concept or teaches a skill to the student and often incorporates reinforcing drill-and-practice segments with branching based on student performance.

CA CONTENT AREA - Educational or content area for which the program is designed or in which it may be used.

GL GRADE LEVEL - Proficiency/grade level with which the program may be used, such as:

- Preschool Education (Birth-PreK)
- Primary Education (K-3)
- Intermediate Grades (4-6)
- Junior High Schools (7-8/9)
- High Schools (9/10-12)
- Higher Education (leading to a formal degree)
- Adult Education (not leading to a formal degree)
- Adult Basic Education (through grade 8).

AB ABSTRACT - Description of the program's format, content, purposes, suggested uses, documentation, etc.

EV EVALUATION - References to identified reviews in the computing press or evaluations by courseware evaluation services.

DT DATE - Date entered/modified in MICRO.

AB: Contains a complete German self-study or classroom course from beginning level onward, presenting 2,250 words of basic German vocabulary. The package includes seven diskettes of tests, drills, and teaching routines, with screen instructions usually in English; six audio cassettes recorded in German, containing dialogs and listening comprehension tests; one textbook, completely in German, with printed versions of the dialogs and exercises; and one workbook in English, containing grammar explanations, exercises, a glossary, and an answer key. Software incorporates a special German character set allowing access from the keyboard to upper-case and lower-case letters and all German characters and diacritics, with no hardware modifications necessary. Most drills require students to enter full words, phrases, or sentences, with multiple correct answers allowed for where appropriate. Student receives a score at end of each drill and can then end session or return to menu. Over 195 vocabulary, grammar, and usage programs are included on the diskettes, with authoring and printing utilities for supplementary drills.

AB: Consists of a reading program built around the technique of dismantling a text and asking the reader to restore it word by word, thus developing both reading skills and productive language skills. Includes teacher's disk for use in creating texts and students' disk, which comes with sample texts that may be retained or replaced by teacher. Special character sets allow teacher to enter texts in English, French, or German, with minor keyboard adjustments for special characters and diacritics. Student may begin by seeing text; program then replaces text with dashes to indicate length of missing words, while retaining punctuation. Student then guesses a word that appears in the text; computer displays that word wherever it appears. Student continues guessing words until complete text is restored. Can accommodate up to 18 texts of 19 lines each. Suggested for use at all reading levels with English as a second language students, foreign language students, and special needs students. Includes user's manual.

GL: Beginning
AB: Beginning English as a second/foreign
language (ESL/EFL) course focusing on
developing productive written mastery of
the first 2,000 words of English, based
on a compilation of several standard
ESL/EFL word frequency lists. As
student works with program, "degree of
difficulty" is continuously maintained
for each vocabulary item. Student may
proceed through course in normal way or
choose to do a "power review," in which
program will first give student those
items currently causing difficulty.
Includes two series, each available
separately and containing five lesson
diskettes, start-up diskette, and
handbook. Optional teachers' management
program also available, allowing teacher
to monitor and record student scores on
separate diskettes and to customize
exercises. Based on materials developed
by American Language Academy.

English as a second/foreign language
course aimed at proven areas of
persistent difficulty for students.
Program provides students experiencing
problems with more exercises than other
students, and automatically recycles
exercises for which incorrect responses
are entered. Contains three series: (1)
Series A concentrates on basic verb
tenses, nouns and pronouns, yes/no and
wh-word questions, prepositions,
adjectives, and adverbs; (2) Series B
covers present perfect tense, modals,
expressions of quantity, comparatives and
superlatives, and relative clauses; and
(3) Series C covers the past perfect
tenses, past modals, passive voice, noun
clauses, conditional sentences, and
infinitives and gerunds. Each series,
available separately, includes six lesson
diskettes, start-up diskette, and
handbook. Optional teachers' management
program also available, allowing teacher
to monitor and record student scores on
separate diskettes and to customize
exercises. Based on materials developed

AB: Contains two companion programs designed to teach young children (ages 3 to 7) the basics of spelling, reading, and computer operation. "Spelling Bee" displays word/picture combinations and drills learner on spelling words and on matching words to pictures. "Reading Primer" displays three separate objects and one word, and learner taps space bar to select the object that matches the word. Also contains "learning manager" feature that allows parents and teachers to select particular word groupings, set the number and length of trials according to learner needs, and review learner's record of performance. Programs cover simple two- and three-letter words; four-letter, one-syllable words; one-syllable with diphthongs; simple multisyllable words; difficult multisyllable words; hard c's and silent e's; double vowels and consonants; and directions and numbers.

AB: Designed as a comprehensive spelling program for students with specific language disabilities or those with spelling deficits. Includes spelling rules, exceptions, and generalizations and provides repetitive exercises and reinforcement. Includes 26 lessons on (1) f-l-s or z rule; (2) doubling rule or one, one, one; (3) silent e rule; (4) y rule; and (5) extension of the doubling rule. Program provides correct answers and summary of student performance with option to continue on request. Suggested for teaching slow learners, adults needing refresher, students studying English as a second language, and other students from fourth grade on up.

AB: Supplementary English as a second language (ESL) course consisting of 80 individual lessons designed to be used independently of one another to fit any ESL curriculum. Lessons cover basic English skills such as punctuation, parts of speech, verb tenses, syntax, pronunciation, drawing conclusions, making generalizations, developing vocabulary, and spelling. Each lesson takes approximately 10 to 15 minutes to complete, but program will proceed at student's rate of progress. Lessons consist of brief video-text screens on language and grammar concepts, followed by 12-item nonpunitive, self-correcting drill and practice session. Question formats are completion, multiple choice, true/false, sequence, matching, and analogy. Program does not require that student know how to type. Suggested for children or adults who can read English at the second grade level. Entire set contains 40 diskettes, available separately or in packages of 5, 10, or 20, and scope-and-sequence for each lesson.

detailed responses stating why answers
are right or wrong. Questions may be as
long as 450 characters; answers and
responses may be up to 225 characters in
length. Scoring system keeps track of
student's progress and keeps detailed
results for teacher. Includes upper and
lower case display and accented letters
without additional hardware.
Incorporates character sets for letters
with accents in Czech, Danish, Dutch,
English, Finnish, French, German,
Hawaiian, Hungarian, Italian, Latin,
Norwegian, Polish, Portuguese, Spanish,
Swedish, and Turkish. Questions,
choices, and responses may be printed out
with accents on most printers for quizzes
or recordkeeping purposes.

AB: Contains companion spelling review and authoring programs. Drill presentation includes three frames: (1) student sees sentence and is given two chances to enter number of "wrong" word: (2) sentence reappears with incorrect word highlighted, and student is given two chances to enter word in correct form: and (3) correct form of sentence appears. Weighted scoring routine discriminates between first- and second-try correct entries. Authoring programs, called "Binder Mechanics," allows teachers to create own vocabulary or grammar drills by entering sentence through an imbedded error, then entering correction, and finally entering remainder of sentence. Includes set of three drills reviewing 75 common spelling problems and instruction booklet.

AB: French-language version of "The Apple's Core" self-instructional program designed to teach Applesoft computer programming to the beginner. Contains instructional manual, 14 teaching modules, and 11 learning tutorials on two diskettes. Teaching modules present detailed explanations and examples of programming statements. Learning tutorials complement corresponding modules and provide over 35 hands-on programs featuring "Easy-Type" feature that eliminates typing and programming errors.

AB: Eight-program package helps preservice and inservice teachers master the decoding concepts of phonics and structural analysis. Intended as supplementary learning materials for an introductory course in reading methods or phonics. Each program uses the context of a game to give students practice in identifying and applying these concepts: phonemes, decoding terms, vowel sounds, phonemic symbols, consonant sounds and symbols, suffix generalizations, and syllabication. Includes pre- and postassesment multiple-choice tests. Following each test, program tells students which other programs to practice to improve skills. Results of assessment tests are available to the instructor in an instructor's report (displayed on screen or printed out) that includes each student's name, individual score, and a list of the student's weak topics based on test questions missed. Includes instructor's notes and two program diskettes.

AB: Seven tutorial lessons that allow students to practice applying some of the most troublesome points of Spanish grammar: "para" vs. "por"; "ser" vs. "estar"; preterit vs. imperfect; and subjunctive (including four lessons on uses of the present subjunctive in noun clauses). Exercises in the lessons use various formats, ranging from simple fill-in sentences, where the student types in correct word or form of verb, to complete English sentences the student translates into Spanish. Each lesson begins with a summary of the grammar point and then presents 45 to 75 practice items in groups of 15. Students can decide after each group if they want to continue; they can also return to the lesson later. Programs report a score of correct and incorrect for each lesson. Lessons supplement regular classwork and assume that students know the verb forms and have been introduced to the grammar structure. Includes instructor's manual, student reference card, and four program diskettes.

AB: Provides practice in five grammar formats of the College Entrance Examination Board's English Achievement Exam. Includes five problem formats: (1) student must decide which of four words or groups of words in a sentence contains an error; (2) student must decide what type of error makes a sentence incorrect, such as error in grammar, diction, wordiness, or mixed metaphor; (3) student must select correct one of four rewrites of a sentence; (4) student must determine what type of error makes a sentence incorrect, such as error in punctuation, agreement, comparison, or faulty parallelism; and (5) student is instructed to change a sentence in a particular way and must select best rewrite from among four choices. Features explanations of options and corrected sentences. At end of each session, program gives student achievement score and analysis of kinds of errors made. Also suggested for general grammar tutorial and review use with high school students. Programs available separately or as a set of five.

AB: Series consists of five programs designed to supplement instruction in three areas of Latin grammar: morphology, sentence translation, and parsing of words in context. The series contains 40 hours of instruction and may be used to supplement class material, for remediation, or as the core of an individualized course. Several versions are available, each tailored to a popular Latin textbook. Program features include variable skill levels, help for partially correct answers, generative grammar, and a concept review for missed items rather than repetition of the item itself. Individual programs are as follows: (1) "Verb Factory," diagnostic exercises on Latin verbs; (2) "Cursus Honorum," remedial practice with verbs; (3) "Mare Nostrum," noun adjective phrases; (4) "Translat," Latin sentence translation; and (5) "Artifex Verborum," parsing Latin words in context. Programs may be ordered separately or as a set.

AB: Program provides instruction in writing for elementary and secondary age students. Program components include the following: (1) the "Planner," which enables the teacher to develop prewriting activities designed to help students organize ideas, collect information, and select topics for writing; (2) the "Library," which enables students to compose, store, retrieve, read, and revise written work; (3) the "Mailbag," which enables students to read and write messages to peers, the teacher, or others; and (4) the "Writer's Assistant," a student-oriented word processing program which enables students to edit, revise, format, and print text. Program may be used with the average learner, handicapped, gifted, and culturally diverse students. Package contains microcomputer software, a backup disk, a teacher's guide, and an implementation guide.

CA: Reading
GL: Intermediate Grades
AB: Reading comprehension program consisting of a management system, a user identification system, and a series of exercises designed to provide drill, practice and help across five skill areas of reading comprehension. The program is delivered in the form of mock newspapers, organized by grade level, readability, and interaction type. Access to specific newspapers is controlled by a student's current level of achievement. Student may select from a range of newspapers and from among five stories in each newspaper. The stories require the student to interact in one of the following five ways: (1) inference from text, (2) deletion, (3) interpretation of graphically presented information, (4) argumentation (analysis and evaluation based on criteria), and (5) vocabulary (root words). Teacher training is an integral and necessary part of the program. Program includes a user package (45 disks, user's manual, and placement tests), a demonstration package (5 disks, and a paper on use of the program), and a teacher training package (8 sample disks, instructional manual, and a discussion paper). Program may be used with the average learner in grades 4-6 and with special populations.

AB: Focuses on the development of math skills such as estimation, prediction, geometry, interpreting and problemsolving strategies, while helping students become computer literate by learning to use and program computers. Computer generated objects can be moved around the screen or viewed from different angles. Computer graphics are used to provide the student with accurate feedback. Package includes microcomputer software, teacher's guide, and implementation guide. Program may be used with the average learner in grades 5-8 with appropriate applications for handicapped, gifted, and culturally diverse children.
